Mixing Directions

Clean thoroughly all tanks, hoses filters, and nozzles prior to contact with the product. Agitate before and while applying. For best results Microlife should be applied through sprinkler and drip systems, conventional spray equipment. If applying with spray equipment, disc under within eight (8) hours of applications.

Application Recommendations

Pre-Plant & At Planting

Sprinkler and drip systems use 5-10 gals. per Acre.
Minimum 50 Gallons of Spray Solution per Acre.
Broadcast application 40-50 Gallons per Acre.
Band Application 5-10 Gallons per Acre.
In furrow applications 5-10 Gallons per Acre.
Ornamental and Turf use as a surface application 15-30 fluid oz. Per 1000 sq. ft.
For best results apply applications of recommended rates in the fall and spring.

Plant Parasitic Nematodes and Crops (Including but not limited to)
